

# Invertebrates - Research Project

## PROJECT COMPONENTS:

- A. Research Report (500-700 words)
  - 1. Complete outline/note cards
  - 2. Rough draft
  - 3. Typed on computer/double spaced
  - 4. Correct spelling/grammar
  - 5. Title page
  - 6. Complete bibliography - 4 sources minimum
    - 2 encyclopedias
    - 2 Internet sources
  - 7. Content:
    - a. Taxonomic organization
    - b. Characteristics
    - c. Description/natural history of examples
    - d. Importance
    - e. Points of special interest
- B. Develop a large (18"X24") 4-color poster that presents your topic group of organisms.

## INVERTEBRATE TOPICS:

- Class Anthozoa (sea anemones)
- Class Scyphozoa (jellyfish)
- Class Arachnida (arachnids)
- Class Crustacea (crustaceans)
- Class Diplopoda/Chilopoda (millipedes, centipedes)
- Class Insecta (insects)
- Class Cephalopoda
- Class Gastropoda
- Class Pelecypoda
- Class Crinoidea (sea lilies, feather stars)
- Class Echinoidea (sea urchins)
- Class Holothuroidea (sea cucumbers)
- Class Stellerioidea (sea stars)
- Phylum Annelida (segmented worms)
- Phylum Ctenophora (comb jellies)
- Phylum Nematoda (round worms)
- Phylum Platyhelminthes (flat worms)
- Phylum Porifera (sponges)
