TEACHER:		**GRADE**:	
SUBJECT:	Computer	**WEEK OF**:	

Topic: Learning How to Search the Internet
Aim: Usage of the Computer for Narrow Internet Searches
   Application of the Internet to Spiritual Resource Location

Materials:
   1. **Computer**
   2. **Internet Connection**
   3. **LCD Projector**

Lesson:
   1. **Motivating the Lesson**
      a. Use the Bible to locate a specific Bible verse. Clarify that this is the process of searching- by definition, looking through a body of information for something specific.
      b. Send children on a library hunt for a specific book, but only provide very specific and limited details to aid the search.
   2. **Teaching Students about Searching on the Computer**
      a. Introduce students to computer search engines that are reliable
         i. **What is a search engine?** A place on the internet that allows us to place a question, word or phrase and return lists of information.
         ii. **List of Search Engines:** Google, Askjeeves.com, msn.com, yahoo.com
         iii. **Key Search words:** and, or, using apostrophes and quotations
      b. Demonstrate the use of a computer for searching
         i. **Type in Tom** – show that the search is very vague
         ii. **Type in Tom and Jerry** – show that the results reduce
         iii. **Type in Tom and Brady** - show that the results become more specific
   3. **Have the students attempt to search for internet information about the teacher.**

Summary
   Students will demonstrate the ability to effectively search the internet for information relevant to specific subject matter.

Assessment
   Students will search the internet for their Sabbath school lesson for the week.
